Scott, C. D., 489
Seely, G. R., 473
Shumate II, S. E., 13
Siddiqi, R. H., 391
Smith, M. R., 21
Speece, R. E., 391
Spencer, R. R., 257
Stokes, B. O., 153
Strandberg, G. W., 13
Stuckey, D. C., 219
Suzuki, S., 501

Tanner, R. D., 21
Taylor, P. A., 361

Wallace, C. J., 153
Wang, D. I. C., 103
Wang, S.-D., 103
Wasielewski, M. R., 423
Weissman, J. C., 283, 299
Williams, L. A., 115
Wingard, Jr., L. B., 483
Wise, D. L., 131

Published Symposia of Biotechnology & Bioengineering

1969	No. 1	Global Impacts of Applied Microbiology II Edited by Elmer L. Gaden, Jr.
1971	No. 2	Biological Waste Treatment Edited by Raymond P. Canale
1972	No. 3	Enzyme-Engineering Edited by Lemuel B. Wingard, Jr.
1973	No. 4	Advances in Microbial Engineering (Part 1) Edited by B. Sikyta, A. Prokop, and M. Novák
1974	No. 4	Advances in Microbial Engineering (Part 2) Edited by B. Sikyta, A. Prokop, and M. Novák
1975	No. 5	Cellulose as a Chemical and Energy Resource Edited by C. R. Wilke
1976	No. 6	Enzymatic Conversion of Cellulosic Materials: Technology and Applications Edited by Elmer L. Gaden, Jr., Mary H. Mandels, Elwyn T. Reese, and Leo A. Spano
1977	No. 7	Single Cell Protein from Renewable and Nonrenewable Resources Edited by Arthur E. Humphrey and Elmer L. Gaden, Jr.
1978	No. 8	Biotechnology in Energy Production and Conservation Edited by Charles D. Scott

All the above symposia can be individually purchased through the Subscription Department, John Wiley & Sons.

Contents

Advanced Biotechnology Concepts

Characteristics of Tapered Fluidized Reactors: Two-Phase Systems
H. W. Hsu 1
Biological Removal of Metal Ions from Aqueous Process Streams
S. E. Shumate II, G. W. Strandberg, and J. R. Parrott, Jr. 13
Hysteresis Relationships between Product Rates and Cell Growth Rates in Fermentation Reactions
M. R. Smith, R. D. Tanner, K. H. Badawi, and S. S. Hussain 21
Membrane-Controlled Digestion: Effect of Ultrafiltration on Anaerobic Digestion of Glucose
T. W. Jeffries, D. R. Omstead, R. R. Cardenas, and H. P. Gregor 37

Bioconversion for Chemicals and Intermediates

Potential of Large-Scale Algal Culture for Biomass and Lipid Production in Arid Lands
Z. Dubinsky, T. Berner, and S. Aaronson 51
Alternatives for Energy Savings at Plant Level for the Production of Alcohol for Use as Automotive Fuel
R. Espinosa, V. Cojulun, and F. Marroquin 69
Selective Hydrolysis of Hardwood Hemicellulose by Acids
Y. Y. Lee, C. M. Lin, T. Johnson, and R. P. Chambers 75
Cellulase Production by a New Mutant Strain of *Trichoderma reesei* MCG 77
B. J. Gallo, R. Andreotti, C. Roche, D. Ryu, and M. Mandels 89
Simultaneous Cellulose Hydrolysis and Ethanol Production by a Cellulolytic Anaerobic Bacterium
C. L. Cooney, D. I. C. Wang, S.-D. Wang, J. Gordon, and M. Jiminez 103
Solar Bioconversion Systems Based on Algal Glycerol Production
L. A. Williams, E. L. Foo, A. S. Foo, I. Kühn, and C.-G. Hedén 115
Organic Chemicals and Liquid Fuels from Algal Biomass
J. E. Sanderson, D. L. Wise, and D. C. Augenstein 131
Assessment of *Nif*-Depressed Microorganisms for Commercial Nitrogen Fixation
C. J. Wallace and B. O. Stokes 153

After Dinner Address

Minimizing Residential Energy Growth
E. Hirst 175

Recovery of Gaseous Fuels and Other Resources

Biological Removal and Recovery of Trace Heavy Metals
R. T. Hatch and A. Menawat 191
Bioconversion of Agricultural Wastes into Animal Feed and Fuel Gas
M. Moo-Young, A. Moreira, A. J. Daugulis, and C. W. Robinson 205
Thermochemical Pretreatment of Nitrogenous Materials to Increase Methane Yield
D. C. Stuckey and P. L. McCarty 219
Solids Recovery from Methane Fermentation Processes
P. H. Boening and J. T. Pfeffer 235

Enhancement of Methane Production in the Anaerobic Digestion of Sewage Sludges
R. R. Spencer 257
Kinetics of Methane Fermentation
Y. R. Chen and A. G. Hashimoto 269
Solar Energy Conversion with Hydrogen-Producing Cultures of the Blue-Green Alga *Anabaena cylindrica*
P. C. Hallenbeck, L. V. Kochian, J. C. Weissman, and J. R. Benemann 283
Cultivation of Nitrogen-Fixing Blue-Green Algae on Ammonia-Depleted Effluents from Sewage Oxidation Ponds
J. C. Weissman, D. M. Eisenberg, and J. R. Benemann 299
Energy Recovery from Landfilled Solid Waste
F. B. DeWalle and E. S. K. Chian 317

Environmental Control Technology

Pilot-Plant Demonstration of an Anaerobic Fixed-Film Bioreactor for Wastewater Treatment
R. K. Genung, D. L. Million, C. W. Hancher, and W. W. Pitt, Jr. 329
Use of Powdered Activated Carbon to Enhance Methane Production in Sludge Digestion
T. McConville and W. J. Maier 345
Operation of a Fluidized-Bed Bioreactor for Denitrification
C. W. Hancher, P. A. Taylor, and J. M. Napier 361
Biological Treatment of Aqueous Wastes from Coal Conversion Processes
J. A. Klein and D. D. Lee 379
Acclimation and Degradation of Petrochemical Wastewater Components by Methane Fermentation
W. L. Chou, R. E. Speece, and R. H. Siddiqi 391
Biodegradation of High-Level Oil-in-Water Emulsion
R. M. Davis 415

Biomimetic and *in vitro* Processes

Biomimetic Approaches to Artificial Photosynthesis
J. J. Katz and M. R. Wasielewski 423
Cell-Free Agriculture: The Concept and Its Initial Implementation
C. A. Rebeiz and M. B. Bazzaz 453
Chlorophyll on Plasticized Particles—A New Model System
G. R. Seely 473
Direct Electron Transfer at an Immobilized Cofactor Electrode: Approaches and Progress
L. B. Wingard, Jr., and J. L. Gurecka, Jr. 483
Use of Cell-Free Biological Systems for Hydrogen Production
B. Z. Egan and C. D. Scott 489
Application of Biochemical Fuel Cell to Wastewaters
S. Suzuki, I. Karube, and T. Matsunaga 501
Author Index 513
